

## Mini-beasts in the Classroom

Why not book our mini-beasts to visit your classroom?

We will bring along a range of different invertebrates originating from many countries (including Britain)

Following an introductory talk about Bugs and mini-beasts - which are the most prolific of all creatures on our planet - your class/group will have the opportunity to handle some of the mini-beasts.

The activity will conclude with a question and answer session.

Our sessions can be adapted to suit all age and ability levels.

**New for 2009:** Archie the Corn Snake, Baldrick the Bullfrog and Buddy the Leopard Gecko

We will also provide photocopy able worksheets to complement the appropriate module.

## Mini-beasts Safari

Using your school grounds, we take a journey of exploration into the undergrowth and discover the hidden world of the mini-beast

We will bring along various items of equipment students can use on their mini-beast safari.

Students will be able to use a variety of ID Charts to identify specimens they have caught/observed

We can offer the following activities:

- 🌸 Grassland Mini-beasts
- 🌸 Woodland Mini-beasts
- 🌸 Pond Dipping

## Earth Science

Rocks and Fossils are an essential part of the understanding on how our Earth works.

We will look at how fossils were formed and bring along a variety of different fossils for students to handle

We will look at different types of rocks and discover how they were made. Experiments will be conducted by students in order to see how and why various geological activities take place.

This session can be adapted to all ages and ability levels.

We will provide the relevant worksheets concerning rock and fossil formation and associated elements of the module. If the school is in an area with good geological interest, then elements of this activity may take place outdoors
